LiteLüvr®

THE FACTS ABOUT LITELÜVR

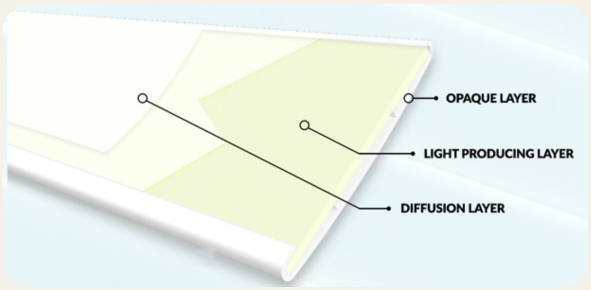

Four questions, clearly answered.

Window-integrated lighting: a handcrafted shutter that produces its own soft, fully diffused light.

Q1 How does LiteLüvr work?

Every LiteLüvr louver is a three-layer lighting system, and each layer has a specific job.

OPAQUE LAYER
Complete privacy and full control over daylight, so the room is as private or as bright as you want it.

LIGHT-PRODUCING LAYER
Integrated LED arrays inside every louver produce brilliant, fully dimmable light at any hour, whatever the view outside.

DIFFUSION LAYER
Spreads that light evenly into a soft, shadowless glow that feels more like atmosphere than illumination.

Q2 How is LiteLüvr built?

Custom built to order and assembled by hand.

Every frame, louver, and stile is made for its window. Solid cellular PVC insulates well and is flame retardant, water repellent, and termite-proof. A water-based, UV-protected finish creates a durable, low-maintenance surface that resists dings and scratches. Suitable for dry and damp locations.

Q3 How long do the louvers last?

Built to live as long as the room they light.

The 3.5 inch polycarbonate louvers resist moisture and UV exposure, holding their color and shape year after year. The integrated LEDs are rated for up to 50,000 hours, and every louver is serviceable, replacing as simply as any standard shutter louver.

Q4 How is LiteLüvr controlled?

By touch, by app, and by hand, each with its own role.

Touch control on the shutter stile. Turn the light on or off, set the brightness, or start sunrise and sunset modes that gently brighten and dim like the rising and setting sun.

The LiteLüvr app for iOS and Android. Connect over Bluetooth and Wi-Fi to control and schedule light by panel, window, room, or the entire home.

Tilt the louvers for daylight. Tilting the louvers adjusts how much outside light enters the room, independent of the glow from within.

Voice control through Google and Alexa is coming soon.

50,000 hours	Under 4W	Warm or bright	Low-voltage DC
rated LED life	per square foot at full brightness	white light, chosen at order	one hidden connector plugs in
