LiteLüvr®

WINDOW-INTEGRATED
LIGHTING SHUTTERS

THE VERTICAL LIGHT PLANE

Lighting has always come from above. *Until now.*

LiteLüvr turns plantation-shutter louvers into a soft, controllable light source; a warm vertical plane of light where the window once went dark. The only light of its kind, glowing outward from the window itself rather than down from the ceiling.

By day

Beautiful, architectural shutters that manage privacy and daylight.

After dark

The louvers cast a candlelight-warm glow into the room. The window stays present instead of becoming a dark rectangle.

01 · LIGHT

LED arrays at the heart of every 3.5″ premium-grade louver.

02 · DIFFUSION

Super-diffused and shadow-free. A soft, shadow-free wash.

03 · PRIVACY

Full window-covering privacy and function retained, day and night.

See how LiteLüvr could transform your space.
